

science of ascension

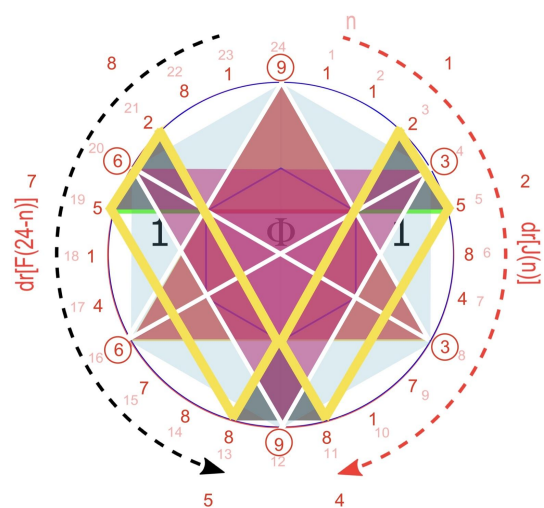

Welcome to the [IOH] taskforce of people, business and government, together providing solutions for the planetary wide evolutionary jump in the human epigenome, via [IOH] [global phase i - iii clinical study](#).

Ascension is defined as the planetary wide evolutionary jump in the human epigenome, modulating the higher states of consciousness of **self-awareness, self-actualisation** and **self-transcendence**. The latter is generally known within spiritual traditions as enlightenment. Ascension differs from the ancient tradition where individuals attained enlightenment through devoted spiritual practices. They are very similar however **ascension** involves a **wider group** of human beings on the **same evolutionary trajectory, attaining enlightenment simultaneously**.

This document is a simple key, bridging [IOH] [medical research](#) & spiritual practices known as enlightened technology, for interpreting [IOH] [clinical study](#) from a lay perspective.

Three Fold Flame

[Fibonacci Sequence M9 P24](#)

Definition:

Within Vedic, Hindu and Buddhist spiritual traditions, the threefold flame, also known as the heart flame and secret chamber of the heart, is the seed of the divine presence and higher self within the Heart Chakra, Anahata (Sanskrit: अनाहत). It is an **Eighth Ray**, ultraviolet, **eight fold geometry**.

Within science it is called [Fibonacci Sequence Modulus 9 Pisano 24](#) (Fib M9 P24). [Fib M9 P24](#) modulates three primary genes via three key frequencies (see table i).

Table i : Epigenetic x Enlightened Technology Grid

ratio	frequency	spectrum	gene	esoteric	psycho - spiritual
Fibonacci α	7.83hz	1st Blue Ray	dopamine	power elohim brahma	ego
Fibonacci β	111hz	2nd Yellow Ray	DMT	light enlightened masters vishnu	higher self
Fibonacci γ	528hz	3rd Pink Ray	oxytocin	love archangels shiva + shakti	divine presence

science of ascension

The epigenetics of ascension is marked by [biological phenomena](#) called a [Holliday Junction](#) or [DNA Cruciform](#) (cross). This cruciform features a specific prime number distribution within modulus 9 (figure i), around a plane of 24. This prime number Holliday Junction is harmonic with Fib M9 P24, where the [8th dimensional \(E8\)](#) Fibonacci M9 P24 evenly distributes primes in a cross formation.

Holliday Junctions are important for the critical biological processes of [DNA recombination and repair mutations](#) that occur in the cell. Cruciform structures are [fundamentally important](#) for regulation of gene expression.

Prime number Holliday Junctions modulate a rare [single nucleotide polymorphism](#) (SNP) within the Oxytocin Receptor Gene ([OXTR](#)), [responsible for self mastery](#). Specifically this SNP modulates ascension. SNPs are the primary driver of evolutionary change ([Nature](#)).

[Holliday Junction](#)

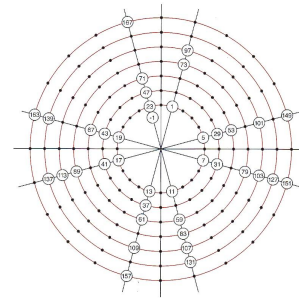

Figure i

Universal Mind propose that ascension is

- i. the natural state of human evolution
- ii. primarily an [epigenetic](#) phenomena
- iii. currently in a state of acceleration

This acceleration sees [cosmic and solar radiation modulating our genes](#) responsible for self awareness, self mastery and self transcendence.

science of ascension

Universal Mind are exploring the phenomena of ascension via:

- a. [bioinformatic](#) analysis of OXTR SNPs mapped to Maslow's Epigenetic Hierarchy of Needs (table ii).
- b. [bioinformatic](#) analysis of [solar and cosmic radiation](#) including Earth's [Schumann Resonances](#)
- c. [bioinformatic](#) analysis of [Fibonacci Sequence Modulus 9 Pisano 24](#) in steps a. and b.

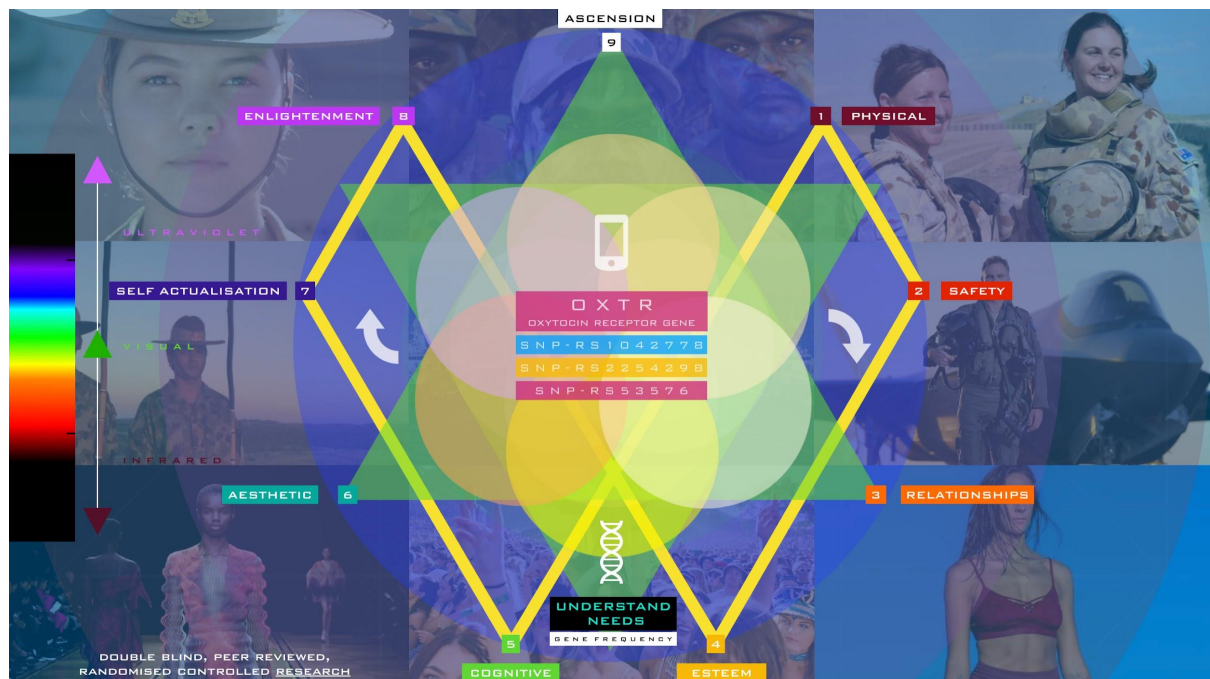

Table ii : Maslow's Epigenetic Hierarchy of Needs

The analysis of OXTR SNPs is a randomised controlled clinical study involving both people with mental illness and people self-reported expanded states of self awareness, from [self actualisation](#) to [enlightenment](#).

The real work begins in **exploring how the phenomena of ascension can serve us to better understand and support evolving states of consciousness**, which most commonly begin in a mental breakdown, manifest as anxiety, depression and psychosis.

Further, in understanding the fundamental maths that unifies the ascension process, how can human beings participate in the process and support it via evidence based science?

Universal Mind envision a **multi-disciplinary approach** where **indigenous shamanic traditions**, **esoteric spiritual knowledge** and **psychology**, together compliment each other in **understanding** and actively modulating **human evolution of consciousness**.

Epigenetic analysis, combined with biometrics and survey data, within a [double blind](#), [randomised controlled peer reviewed](#) study, are our platform for the coming together of many disparate yet complementary insights into the human psyche and happiness.
